Corporate Web Control

Secure. Simplify. Stay Productive.

The internet powers everything we do—but it can also be a distraction or a risk. Corporate Web Control helps you take charge of your network by blocking unwanted sites, securing sensitive data, and keeping employees focused on what matters most.
Whether at the office or at home, Corporate Web Control ensures safe browsing, stronger productivity, and complete peace of mind.

Key features of Corporate Web Control

Block by Category
Instantly block entire categories like Social Media (Facebook, Instagram, Twitter, LinkedIn), Video, Music, Games, or Adult content—without adding sites one by one.

Invisible & Protected Software
Hidden from Add/Remove Programs and Task Manager. Only administrators can manage it, ensuring users cannot uninstall or disable it.

Traffic Monitoring
Track daily and hourly bandwidth usage (downloads/uploads in MB) for each device to optimize performance.

WhatsApp Attachment Blocking
Prevent outgoing attachments (docs, PDFs, audio, video, etc.) via WhatsApp Web to keep company data secure.

User-Friendly Interface
Simple installation and management with a customizable dashboard. Supports remote setup across your Active Directory network.

Keyword Content Filtering
Block web pages based on specific keywords defined by administrators

Time-Based Internet Control
Schedule internet access by day and time, with flexible policies for different groups.

Torrent Blocking
Restrict torrent downloads to save bandwidth and prevent illegal activity.

Download Size Limits
Block large file downloads (e.g., videos, installers) to conserve speed and resources

Reporting Dashboard
View top websites accessed across the organization. Add approved sites to an Ignore List for easier monitoring.

Application Control
Restrict internet access for specific apps like TeamViewer, AnyDesk, or Orbit Downloader.

Central Policy Management
Manage policies for all departments, branches, and laptops from one console.

Optimized Browsing
Lightweight client ensures fast browsing and smooth performance.

SSL Secure Sites
Encrypted connections guarantee safe access to work-related sites.

System Asset Management
View hardware details, user info, and disk space across all devices.

Cloud-Based Control
Manage policies and reports remotely from any device, including via the CWC Android app.

Graphical Dashboard
Access statistics and controls through a modern, cloud-based panel.

Flexible Licensing
Choose plans based on the number of client PCs in your organization.

Secure Servers
Hosted in data centers with biometric locks and 24/7 surveillance.

User Access Requests
Employees can request site access, which admins can approve or deny.

Powerful Website Blocking
Prevent access to distracting and harmful sites, improving productivity across the organization.

Advanced Device Control
Block USBs, mobiles, CDs/DVDs, and portable devices with ease

On-Demand Web Filters
Add or remove filters for specific applications instantly.

Public IP Filtering
Apply restrictions based on organizational IP policies.

Automatic Updates
Always stay protected with the latest software updates.

User Activity Reports
Generate detailed reports on browsing history, applications used, and time spent.
